Volume 65, Numbers 1–3, March 1997

Journal of
Materials
Processing
Technology

Contents

Modelling of ceramic grinding processes
Part I. Number of cutting points and grinding forces per grit 1
K. Li, T.W. Liao (Baton Rouge, LA, USA)
Prediction of die wear in the wire-drawing process 11
T.H. Kim, B.M. Kim, J.C. Choi (Pusan, South Korea)
Backward UBET simulation of the forging of a blade 18
Z. Wang, K. Xue, Y. Liu (Harbin, People's Republic of China)
A note on the stresses of the middle gate bay of Three Gorge Lock. 22
W. Feng, M. Wen (Qingquanzhai, People's Republic of China), X. Huimin (Beijing, People's Republic of China), L. Laishou (Qingquanzhai, People's Republic of China)
Assisting designers in the forecasting of surfaces used for easier fixturing in a machining process 26
D. Brissaud, H. Paris, S. Tichkiewitch (Grenoble, France)
CAP-GO computer-aided planning of grinding operations for ferrous components 34
R. Gupta, G.S. Sekhon, K.S. Shishodia (New Delhi, India)
The influence of the cooling rate on the microstructure of Al–Cu–Si, Al–Si and Al–Zn alloys. 41
M. Ceylan (Elaziğ, Turkey), İ. Aksoy (Malatya, Turkey), V. Kuzucu, Ş.N. Balo (Yalvaç) (Elaziğ, Turkey)
Finite-element simulation of V-die bending: a comparison with experimental results. 52
A. Nilsson, L. Melin, C. Magnusson (Luleå, Sweden)
Thickness distribution in a superplastically formed rectangular pan under plane-strain conditions. 59
S. Lee (Chung-li, Taiwan, ROC)
Alternative method for the evaluation of the abrasive water-jet cutting of grey cast iron 65
A.W. Momber, R. Kovacevic, H. Kwak (Lexington, KY, USA)
Thermal spraying of Ti–6Al–4V/hydroxyapatite composites coatings: powder processing and post-spray treatment . . . 73
C.S. Yip, K.A. Khor, N.L. Loh, P. Cheang (Singapore, Singapore)
Automatic synthesis of membership functions for the force control of turning operations 80
Y.S. Tarng, C.Y. Nian (Taipei, Taiwan, ROC), J.Y. Kao (Taoyuan, Taiwan, ROC)
Injection forging of tubular materials: a workability analysis 88
S.B. Petersen (Lyngby, Denmark), J.M.C. Rodrigues, P.A.F. Martins (Lisbon, Portugal), A.B. Lopes, J.J. Grácio (Aveiro, Portugal)
Improving the mechanical properties of boronized layers by superplastic boronizing 94
C.H. Xu (Auckland, New Zealand), J.K. Xi (Luoyang, People's Republic of China), W. Gao (Auckland, New Zealand)
A set-theoretic automatic selection of cutting tools in manufacturing system 99
N.K. Jha (Riverdale, NY, USA)
Instability map for cold and warm working of as-cast 304 stainless steel 107
S. Venugopal, S.L. Mannan (Tamil Nadu, India), Y.V.R.K. Prasad (Bangalore, India)
Residual stresses with different tool flank wear lengths in the ultra-precision machining of Ni–P alloys 116
Z.-C. Lin, W.-L. Lai (Taipei, Taiwan, ROC), H.Y. Lin (Hsinchu, Taiwan, ROC), C.R. Liu (West Lafayette, IN, USA)
Three-dimensional crystallizing combined π-bonding orbitals ('O's' bonding) and plastic deformation by twins and dislocation 127
H.-K. Oh (Soowon Wonchondong, South Korea)
Analysis of three-dimensional transient heat conduction for predicting wire erosion in the wire electrical discharge machining process 134
S. Banerjee, B.V.S.S.S. Prasad, P.K. Mishra (Kharagpur, India)
Numerical implementation of orthotropic plasticity for sheet-metal forming analysis 143
M.L. Boubakar (Besancon, France), Ph. Boisse (Paris, France), J.C. Gelin (Besancon, France)
The centennial year of Herbert Walker Swift, 1894–1960, Professor of Engineering in the University of Sheffield: his life and work. 153
W. Johnson (Chapel-en-le-Frith, UK)

Elsevier Science S.A.

A note on stress- and strain-analysis for materials with different elastic modulus and a photoelastic solution of the stress state for points on the interface 165
W. Feng (Qingquanzhai, People's Republic of China), X. Huimin (Beijing, People's Republic of China), Y. Zhining (Qingquanzhai, People's Republic of China),
Control of interaction impedance using an electrohydraulic servosystem: an application to robotic deburring 172
T. Asokan, M. Singaperumal (Madras, India)
Oxidation and fatigue-life of an AISI-D3 steel machined by electrodischarge 179
M.A. Béjar, W. Schnake, J. Gallardo (Santiago, Chile)
Laser welding of Waspaloy® sheets for aero-engines 183
Z. Li, S.L. Gobbi (Turin, Italy), J.H. Loreau (Moissy Cramayel, France)
A comparison between macroshear redundancy and loading effects in 2- and 3-roll rotary tube cone piercers. 191
W.A. Khudheyer, D.C. Barton, T.Z. Blazynski (Wetherby, UK)
Laser welding techniques for titanium alloy sheet. 203
Z. Li, S.L. Gobbi (Turin, Italy), I. Norris (Rugby, UK), S. Zolotovsky (Louis-Blériot, France), K.H. Richter (Munich, Germany)
Cutting mechanisms and surface features of WED machined metal matrix composites 209
A. Gatto (Ancona, Italy), L. Iuliano (Turin, Italy)
Analysis of superplastic sheet-metal forming in a circular closed-die considering non-uniform thinning. 215
Y.M. Hwang, J.S. Yang, T.R. Chen, J.C. Huang (Kaohsiung, Taiwan, ROC)
Flow-forming of super-tough polypropylene pipes using a twin motor-driven rollers setup 228
K.S. Lee, M.O. Lai, C.M. Chen (Singapore, Singapore)
White speck forming-mechanism and dimple models in the interface fractography of induction pressure butt-welding . . 237
X.P. Zhang, Y.W. Shi (Xi'an, People's Republic of China)
Effect of particulate type on the microstructure and heat-treatment response of Al–Cu-based metal-matrix composites . 245
M. Gupta, S. Qin, L.W. Chin (Singapore, Singapore)
Formability of recycled aluminium alloy 5017. 252
W.H. Sillekens, T. Sano, M. Terasaki, K. Matsuno (Ibaraki, Japan), J.A.G. Kals (Eindhoven, Netherlands)
A PC-based system for procedure developement in laser transformation hardening 261
J.C. Ion (Lappeenranta, Finland), L.M. Anisdahl (Oslo, Norway)
Research and application of precision roll-forging taper-leaf spring of vehicle 268
Yang Shenhua, Kou Shuqing, Deng Chunping (Changchun, People's Republic of China)
Influence of oscillation parameters on crack formation in automatic Fe–B hardfacing 272
A. Scotti, L.A.A. Rosa (Uberlândia, MG, Brazil)
Ultra-precision orthogonal cutting simulation for oxygen-free high-conductivity copper. 281
Z.-C. Lin, S.-P. Lo (Taipei, Taiwan, ROC)
An investigation of unequal interface frictional conditions during the upsetting process. 292
S.Y. Lin (Yunlin, Taiwan, ROC)

Short Communication
Machinability and brittleness of glass-ceramics 302
A.R. Boccaccini (Birmingham, UK)

Letter to the Editor
A proposed new torsion dynamometer 305
A.S. Mahajan (Pune, India)

Conference Calendar. 308

Author Index of Volume 65. 309

The publisher encourages the submission of articles in electronic form thus saving time and avoiding rekeying errors. A leaflet describing our requirements is available from the publisher upon request.
